Work experience

• Python developer with SQL and AWS skills.

Projects

• None identified.

Certifications

• None identified.

Achievements

• None identified.

Missing information

• No clearly labeled projects section was detected in the extracted text.

• No clearly labeled certifications section was detected in the extracted text.

Matching skills

• aws

• python

• sql

Skills to review

• data analysis

Strengths

• Your resume includes job-related skills: aws, python, sql.

• Your resume contains recognizable standard sections.

Weaknesses

• Few requested skills were identifiable from the resume text.

Experience gaps

• Job requirements not evidenced in the extracted resume: data analysis

Recommendations

• If you genuinely have them, make these requested skills easier to find: data analysis.

• Tailor the professional summary to the responsibilities and language of this role.

• Add specific, truthful outcomes and metrics to relevant experience bullets where available.

• Use clear section headings and consistent dates, spacing, and bullet formatting.

Suggested professional summary

• Build a summary from facts in your resume: [verified role or field], [relevant skills], and [specific accomplishment, if documented]. Replace or remove every placeholder you cannot verify.

Suggested resume bullets

• Python developer with SQL and AWS skills.
